

Designed in New Zealand by dental experts, 360PRO products are a great addition to your regular oral care routine.

WHY USE A SONIC BRUSH?

The speed of movement and coverage of brushing are the predominant factors in preventing tooth decay. Sonic toothbrushes use vibration through wave technology to power water, saliva and toothpaste into areas between teeth and below the gum line.

The presence of liquid and bubbles around the speeding brush adds fluid dynamics that reach further than the brush, to clean hard-to-reach areas that conventional brushes can't.

GO 360PRO

For the power of a professional* gentle clean at home!

Our new Sonic power technology gives you up to 90,000 gentle brush movements per minute brushing, polishing and brightening your smile and removing plaque and bacteria from those hard to reach areas. Gentle sonic vibrations remove surface stains from tea, coffee and other coloured foods & liquids to brighten your teeth and restore them to their natural whiteness.

*Does not replace regular hygiene & dentist maintenance appointments.

360
PRO

**PAIR WITH THE
360 PRO WATERFLOSSER
FOR THE ULTIMATE CLEAN**

By purchasing 360PRO you're donating 2 toothbrushes to Kiwi kids through Foster Hope NZ

Designed in New Zealand by dental experts, 360PRO Waterflossers are a great addition to your regular oral care routine.

360PRO Waterflossers offer the most effective combination of pressure and pulse to help flush out plaque and bacteria.

WHY USE A WATERFLOSSER?

Waterflossers are proven to be more effective than traditional flossing. Not only is water flossing easy and quick, it also reaches those places you can't always reach with string floss. Water flossing helps remove plaque and bacteria, for healthier teeth, gums and breath.
